Article no. 332-0108

Product description

The focusable 575 and 800 W multipurpose daylight spotlight lamps Kobold DW 575 and DW 800 can be equipped, as the need arises, with interchangeable reflectors. Depending on the selected attachment, the lamphead provides all the capabilities of a PAR, Open Face or Fresnel light, and a Softbox or Lantern. The conversion is simple and no tools are needed due to a stop mechanism. The optimized design of the reflectors achieve a high light output and an homogeneous illumination. The ergonomically positioned rotary knob enables focusing of 12°- 70°. These daylight fixtures impress with their solid design, compact dimensions and maximum reliability, for indoors and outdoors. The housing of the lamp is made of high-strength aluminum, and has a lockable mount for single-ended HMI/MSR lamps with a high degree of efficiency. The igniter unit is hermetically sealed and guarantees cold and hot starts even in a humid environment. More characteristics are the light weight and compact dimensions, reflector accessories without stray light, heat-resistant ceramic safety glass, IP54.

Technical data

Lamp output	575 W	800 W
Lamp holder	G22	
Focus range (with Open Face reflector)	12° - 70°	
Safety class	I	
Protection degree (with mounted reflector)	IP54	
Dimensions L x B x h/H	226 x 300 x 415 mm (9" x 12" x 16")	
Weight without reflector	3.9 kg (4.5 lb)	
Cable length	0.6m (2ft)	
Stand connection	28mm (1 1/8") spigot with 16 mm (5/8") hole	

Application

With the selected reflector or adapter the focusable DW 575 and DW 800 are 100 % applicable as an Open Face, PAR or Fresnel lamp or as a Softbox or Lantern. They conform to the standard IP54 and are suitable for all indoor and outdoor applications.
